**Homeowners:** Do not submit this certification statement with your income tax. Save with your income tax records along with your receipts.

*Note: When installing barriers or retarders that limit air and moisture infiltration, follow applicable building codes and utilize proper design and construction building methods. Improper installations and or designed systems can trap moisture leading to mold formation or other related problems regardless of the quality of the retarder or barrier. Proper ventilation is required when installing barriers or retarders in confined spaces to prevent the capture of gases or odors that may be present or manifested as a result of installing an air / moisture retarder.*
