

# Grain Storage Solutions to Fit Your Needs

Raven Engineered Films has been helping customers with their grain and feed storage needs for over 40 years by providing high-quality innovative products to meet your needs.

Raven's GrainMax™ and Protector™ series films have become the covers of choice among many of the storage facilities throughout the grain regions of the United States due to superior features and wide ranges of custom sizes.

GrainMax™ covers are produced with our patented DURA+SKRIM® string reinforced material while Protector™ is manufactured using woven material manufactured by weaving high-density polyethylene ribbons and coating them with a low-density polyethylene.

# Raven YokeLift System

Raven's YokeLift system increases tarp strength in the area under the greatest stress during installation. A heavy duty vinyl tarp material securely fastens to a more cost effective polyethylene tarp to meet your budget, while providing superior performance.

## Executive

The Raven Executive Grain Cover is conical shaped and made of a 22oz. vinyl material; custom fabricated to your needed size. The Executive Grain Cover pieces are joined together by the Raven Rain Flap system. Each tip area is reinforced with our YokeLift™ system; a combination of webbing straps and heavy duty vinyl material, custom fitted to your tower lift ring.

- ✓ Exceptional Service Life
- ✓ Trouble Free Installation
- ✓ Custom Form Fitted

## Economy

The Raven Economy Grain Cover is a four-piece, flat, non-fitted, stepped, 14 mil or heavier reinforced polyethylene material. The Economy Grain Cover also includes the YokeLift™ system to help protect your cover from stresses caused by a lift ring. Each section is joined together with the Raven Rain Flap system or by sewing the panels together in the field.

- ✓ Woven or String Reinforced
- ✓ Panel Assembly Options
- ✓ Includes YokeLift™ System

## Rectangle/Oval

Raven Engineered Films can custom make a grain cover for any shaped bunker utilizing our 8 up to 20 mil reinforced polyethylene. Bunkers with towers requiring more than one section can be joined together using our Rain Flap system or by field seaming. Bunkers with round corners can be stepped to reduce extra weight and material for ease in handling.

- ✓ Woven or Scrim Reinforced
- ✓ Optional RainFlap™ System
- ✓ Stepped Option for Oval Shapes
